VKP80III product information

THE STATE OF THE ART OF SELF-SERVICE THERMAL PRINTERS

VKP80III takes self-service kiosks to a level of ease, quality and convenience that has never been seen in the kiosk market. Inspired by the VKP80, it maintains its basic compatibility by perfectly combining **30 years of experience** in the self-service industry.

TARGET MARKET

VKP80III has the possibility to be integrated in a large number of environments.

Compared to other competitors it can manage LARGER paper roll,
has SMALLER footprint, offers ADVANCED ticket management.

KIOSK,
SELF-SERVICE

BENEFITS

Here's how **VKP80III** can improve your business and make your workflow more efficient.

TOP SELLER

The best kiosk printer of all time with its unique green paper mouth

COMPACT

Extremely compact and flexible way to answer of customer needs

ECOGREEN

Print head with auto-diagnostic function and EcoGreen mode useful to reduce consumption

LOWEST TCO

Reliable and robust with less than 0.5 % of faultiness.

ADVANCED PAPER MANAGEMENT

Present/eject/retract full capability. Automatic anti-jamming system. Adjustable paper width.

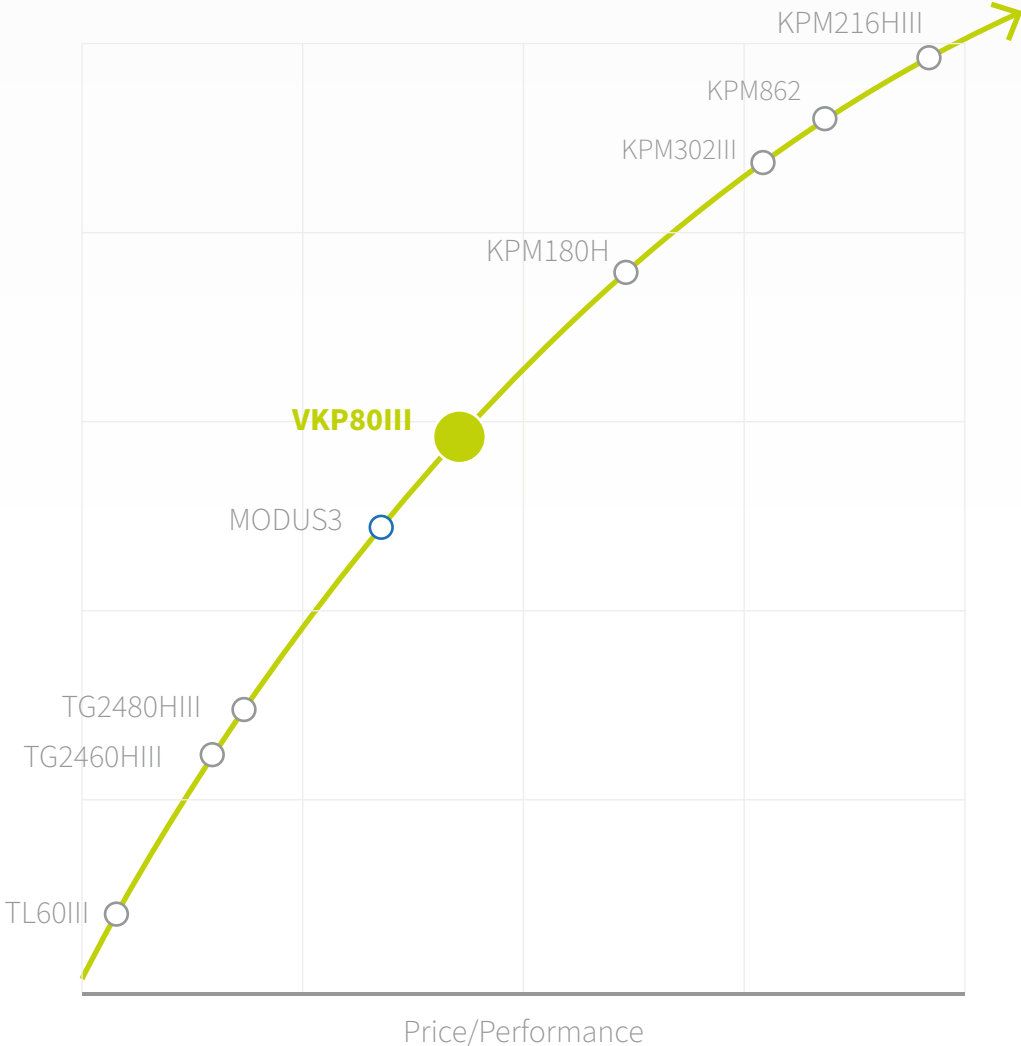

FLEXIBILITY

Setup the printer or draw up a ticket layout with our apps. Expand the functionality with the many accessories available

KIOSK THERMAL LINE UP

- KPM216HIII Tickets in A4 and US letter format
- KPM862 High range printer
(Multibin, Veriprint, stock control, RFID, selector, ejector)
- KPM302III Top performance
(Multibin, stacker, RFID, selector, ejector)
- KPM180H The most compact ticket printer
- VKP80III Presenter, ejecter, collect mode**
- MODUS3 Ultracompact
- TG2480HIII Mechanical antijam 80mm
- TG2460HIII Mechanical antijam 60mm
- TL60III The low-priced reliable 60mm printer

IN THE BOX

The printer comes with the installation/instruction sheet included. Power supply unit, cables, and other accessories and consumable can be purchased from your dealer

VKP80III AT A GLANCE

TICKET INPUT
(WITH ADJUSTABLE PAPER WIDTH)

PRINTER OPENING

OPTIONAL
anti-intrusion shutter

**ILLUMINATED
PRINTER BEZEL**

OPTIONAL
Illuminated printer bezel (Black)

OPTIONAL
*D250mm roll holder bracket
with low paper sensor*

OPTIONAL
*Roll holder bracket with
adjustable paper width and
low paper sensor*

Fixing points for roll holder bracket
(three positions on the right, three positions on the left)

VKP80III AT A GLANCE

VKP80III is sold in three different configurations with USB, RS232 or Ethernet connectors arranged on the side or on the rear.

MODEL WITH CONNECTORS ON THE REAR

Power supply

Status LED

RS232

6-pin Industrial connector with self-retention

USB

2.0 full speed

USB / RS232 MODEL

LF + FF key
On the rear

Power supply

Status LED

USB

2.0 full speed

RS232

6-pin Industrial connector with self-retention

USB / ETHERNET MODEL

LF + FF key
On the rear

Power supply

Status LED

ETHERNET

10-100 Mbit/s

USB

2.0 full speed

ALWAYS UNDER CONTROL

Seven sensors plus three optional allows to control the proper functionality of the device in any moment.

“PRINTHEAD TEMPERATURE”

OPTIONAL
“Black mark” on thermal side

“EJECTOR POSITION”

“TICKET OUT”

“TICKET IN”

OPTIONAL
“Black mark” on thermal side

**ADJUSTABLE “BLACK MARK”
ON NON THERMAL SIDE**

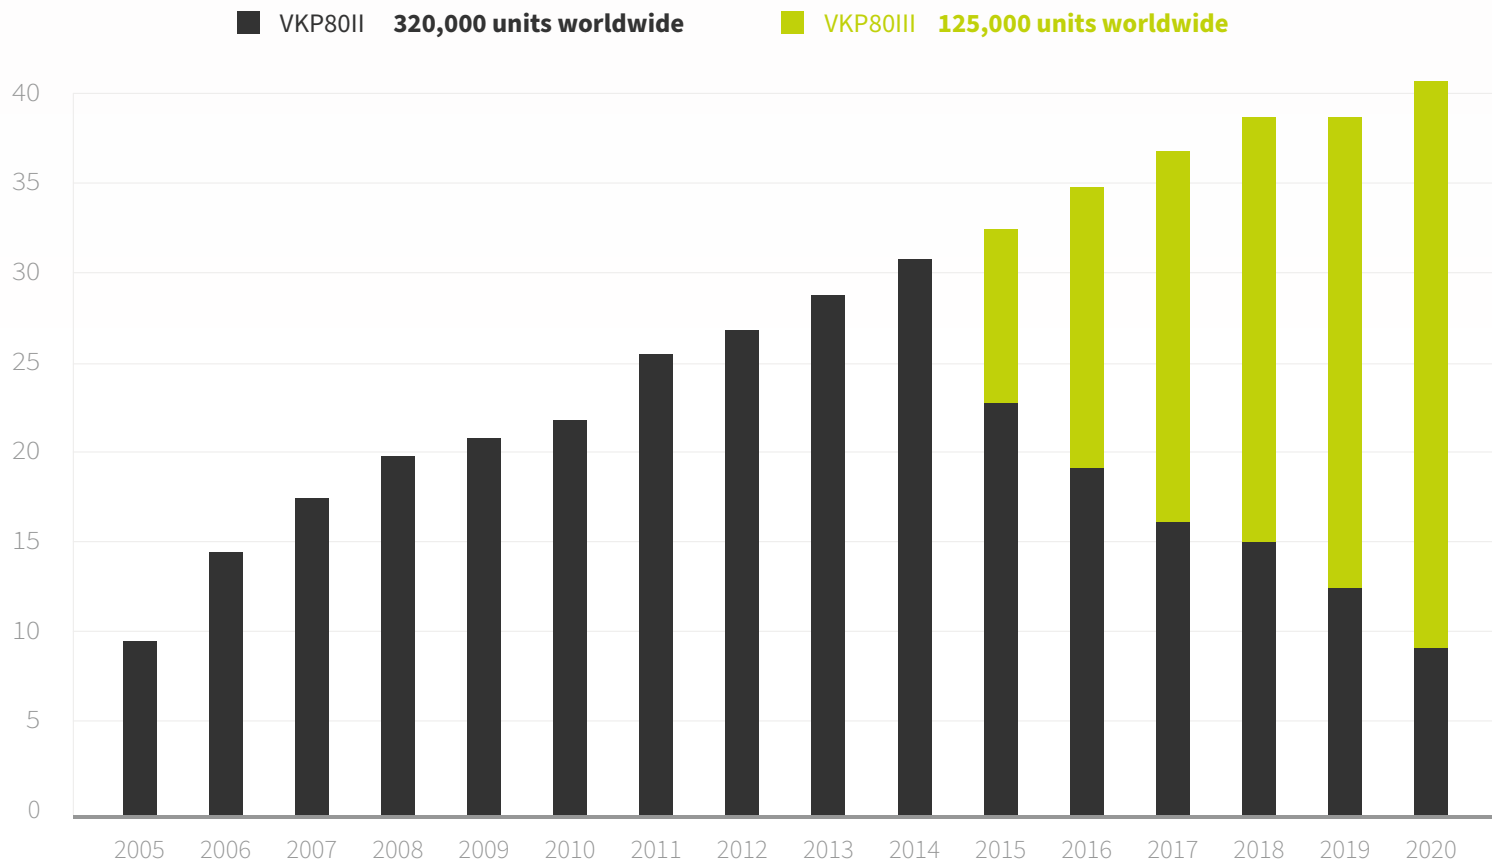

“COVER OPEN”

“TILTING BULKHEAD POSITION”

THE HEIR OF THE QUEEN

VKP80III perfectly combines 20 years of experience in the self-service industry and represents the state of the art of thermal printers.

It is directly inspired by the VKP80II, the "best seller" of the kiosk division with 320,000 units worldwide, maintaining the basic compatibility but adding more features than the VKP80II.

COSTS CUT

At Custom, we know how much the maintenance cost of a printer affects a company's budget.

For this reason, every detail of VKP80III is designed to maximize its operation without the need for interventions on site.

- ✓ *Its reliability is unmatched. Less than 0.5 % of faultiness.*
- ✓ *The shutter kit prevents damage from vandalism.*
- ✓ *Predisposition for large paper rolls reduce replacement interventions.*
- ✓ *The remote monitoring allows to have the printer always under control and operate remotely on them.*

ADJUSTABLE PAPER WIDTH

VKP80III has been designed with a system of adjustable paper guides that allows the use of paper of different formats to meet every need.

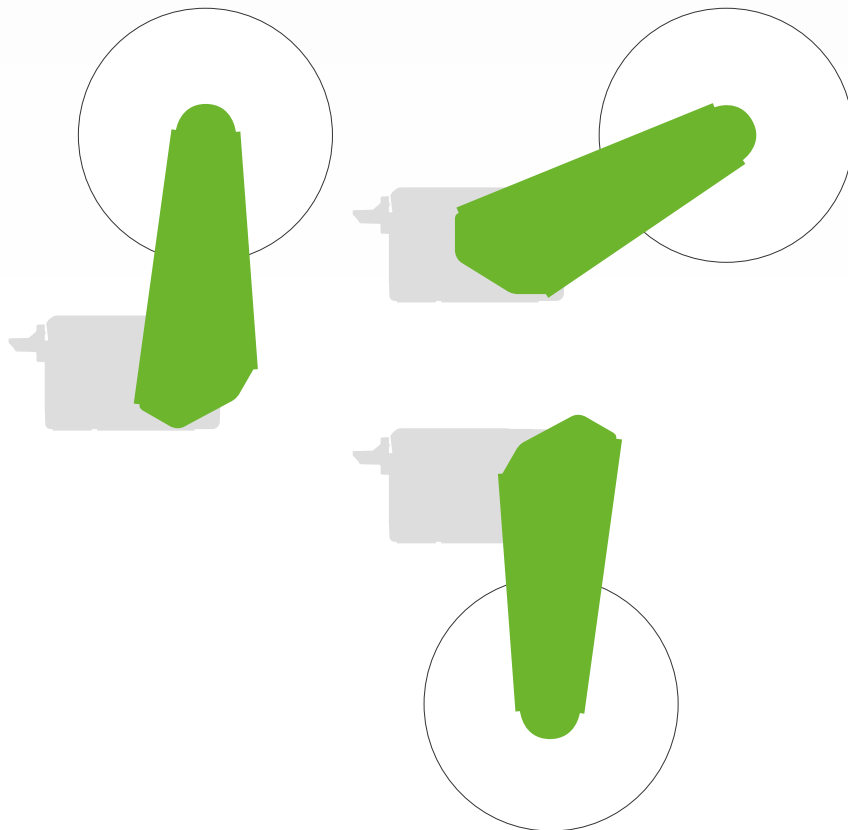

EASY TO BE INTEGRATED INTO THE KIOSK

Mount the roll holder bracket in one of the three positions available on each side.

If this is not enough, then we provide you with the kit to integrate the low paper end sensor in your bracket.

RIGHT SIDE

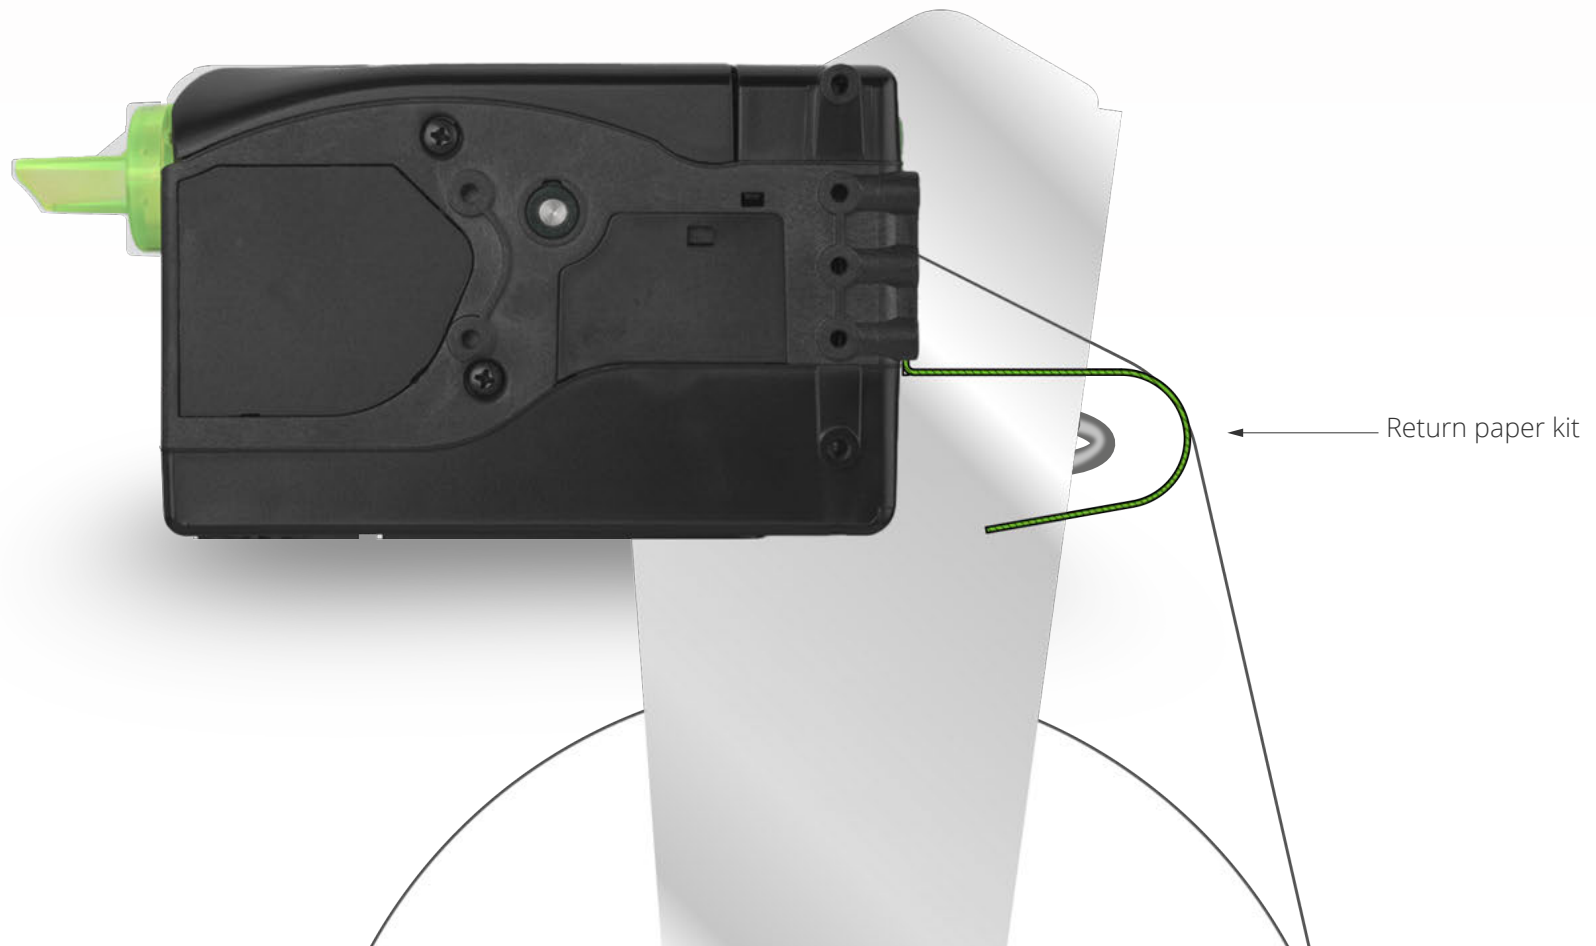

LIFT SIDE

LOWER MOUNT

For mounting the bracket downwards, we recommend mounting the return paper kit to better guide the paper and protect the connectors

EXTRAORDINARY TICKET MANAGEMENT

Thanks to the motorized collection compartment (PATENTED) it is possible to operate with different issuing modes.

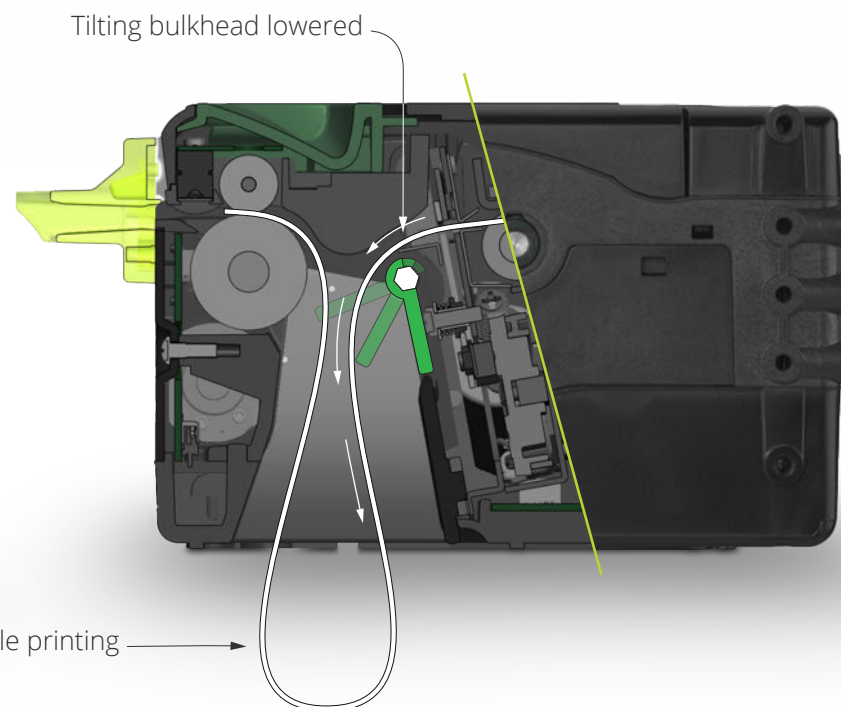

During printing the ticket is taken between the ejection rollers (FIG.1).

In this moment the tilting bulkhead is lowered to allow the ticket to be collected in the ejection channel while the device continues printing (FIG.2).

Once the printing is finished and the cut has been done, the ticket can be ejected, presented, retracted or collected without presentation.

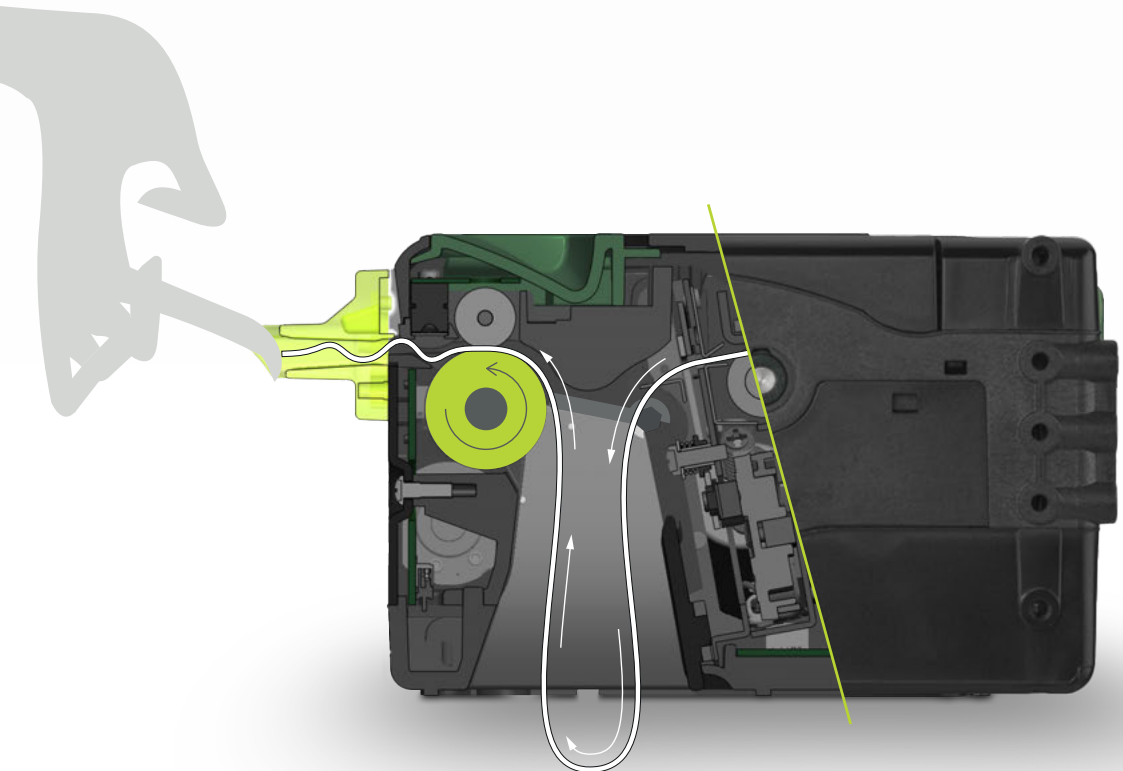

FIG.1 FIRST PHASE OF PRINTING

FIG.2 PRINTING AND COLLECTION

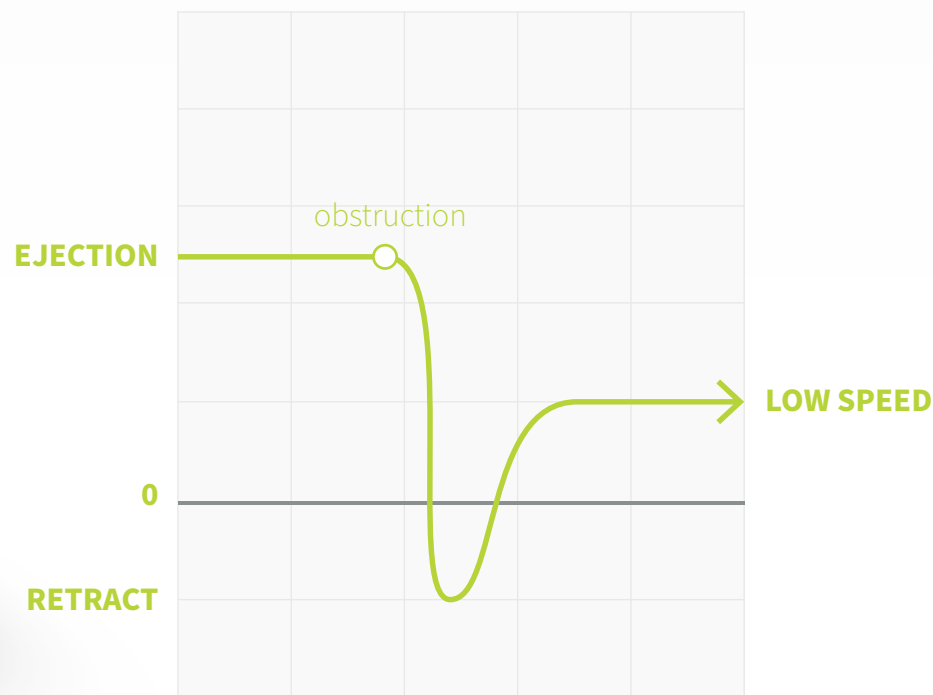

INTELLIGENT ANTI JAM

During the ticket issuing phase, the printer is able to understand if a foreign body is blocking the paper exit. The ejection of the paper is interrupted, a slight retract is performed and the ejection is then attempted at reduced speed. In **95%** of cases this trick solves the problem.

Motor torque

SHUTTER FOR OUTDOOR

Prevents the accidental introduction of objects in the printer bezel and provides high protection against dust, dirt and sand, significantly increasing the life of internal components and reducing the costs of on-site technical assistance.

Easy to install and no need any firmware update!

NEED A COPY OF THE TICKET?

The printer can issue the ticket and print a copy which will be collected in the kiosk without presenting it to the customer.

This guarantees a copy of the ticket / transaction for datalogging or tax recovery.

Don't you want to print a copy? The printer save the receipt data in the flash memory in text or image format.

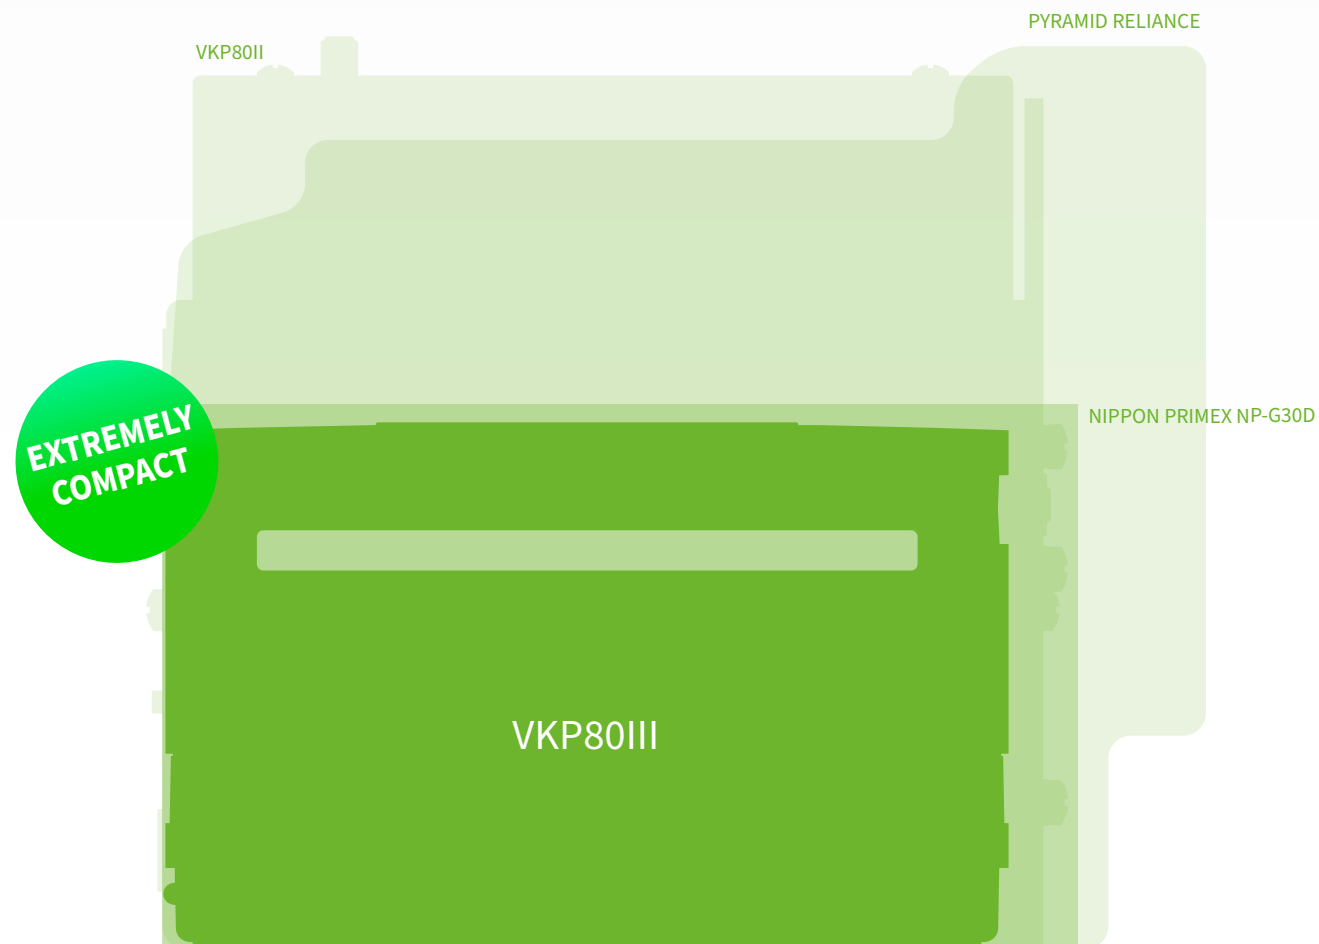

Data can be simply read via USB (mass storage).

VKP80III vs OTHERS

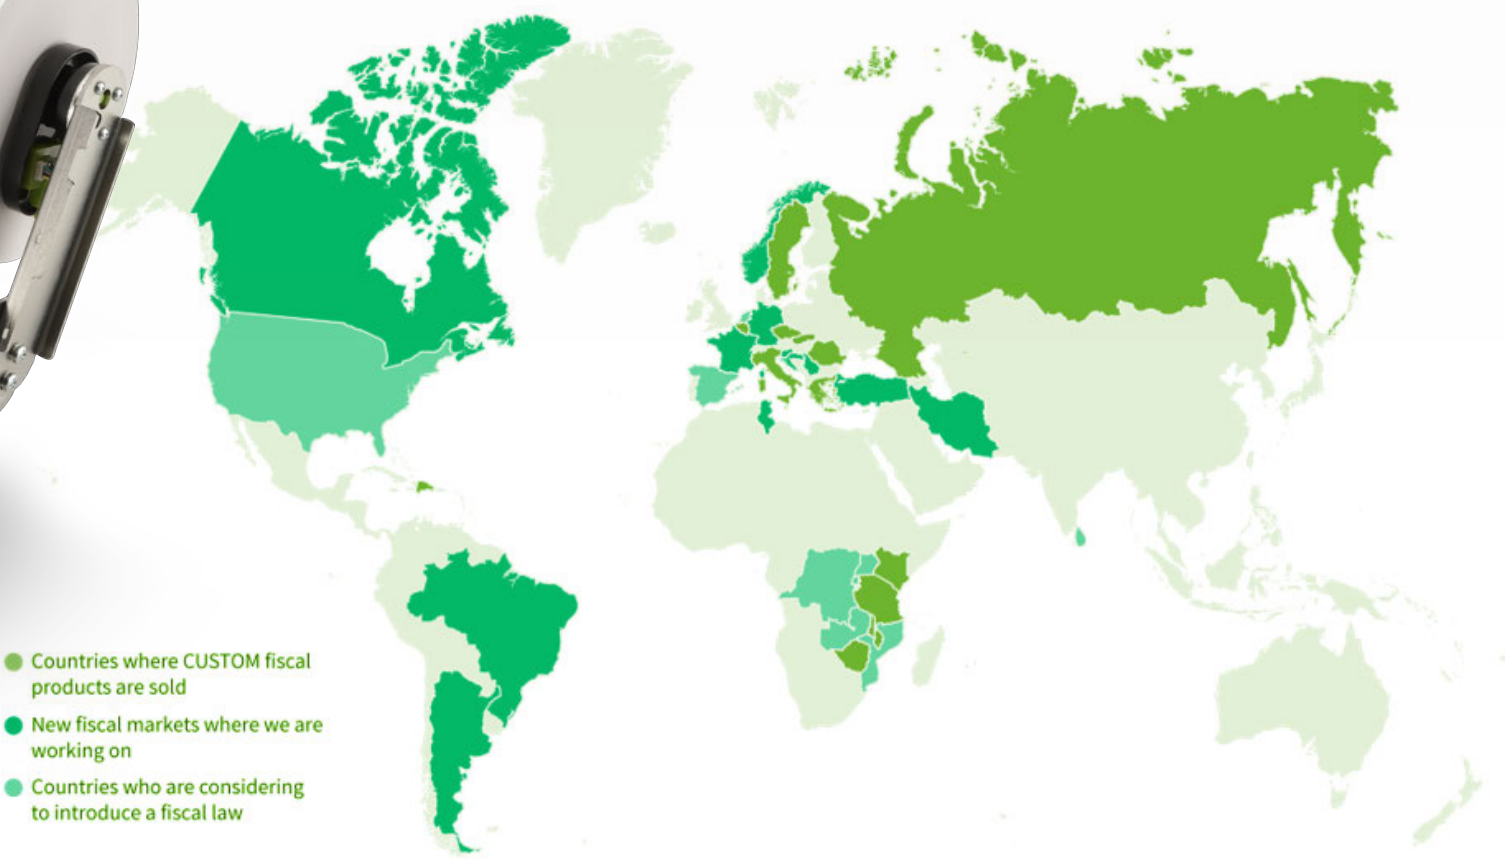

Even at a glance you can see the compactness of our printer **VKP80III**.

A huge step forward has been made compared to the VKP80II.

FISCAL READY

The VKP80III-F model is the version designed specifically for the fiscal markets. Equipped with mechanical seal and electronic journal on MicroSD card it adapts perfectly to any need.

- Countries where CUSTOM fiscal products are sold
- New fiscal markets where we are working on
- Countries who are considering to introduce a fiscal law

FROM EXTREME HEAT TO THE POLAR COLD

VKP80III has been designed to withstand even extreme temperatures.

+70°C **-20°C**

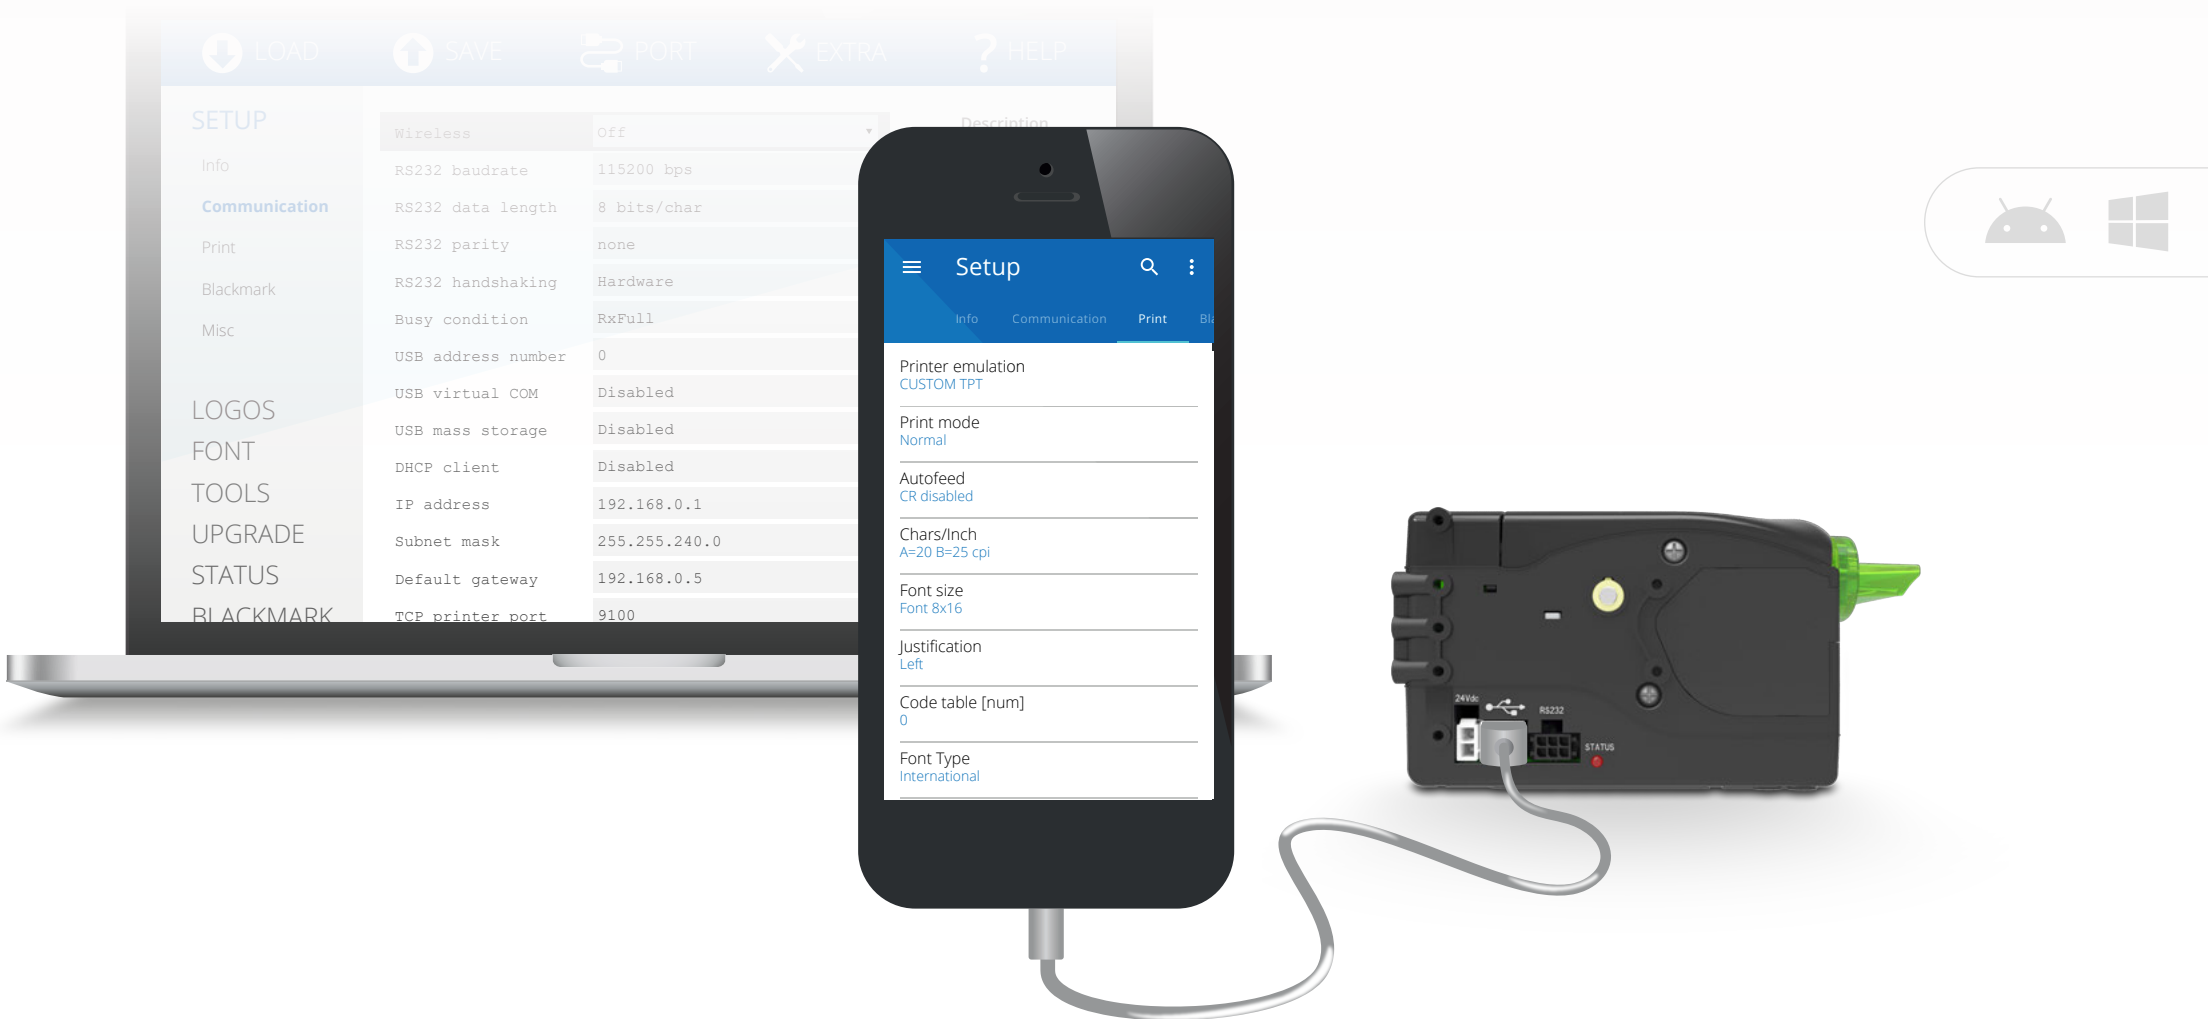

EASY PC OR MOBILE PRINTER SETUP

Custom PrinterSet is a powerful tool for a complete, easy and quick management of your printer.

For example Custom PrinterSet allows you to clone printer configuration by reading and saving printer setup.

Easily configure your printer with an intuitive user interface. Connect the printer to the **PC** or **Android mobile** via USB and launch the app.

EASY PC OR MOBILE PRINTER SETUP

... you can also manage configuration and upgrade tasks with **command line mode** in batch files.

Useful for remotely configuring or updating a fleet of machines

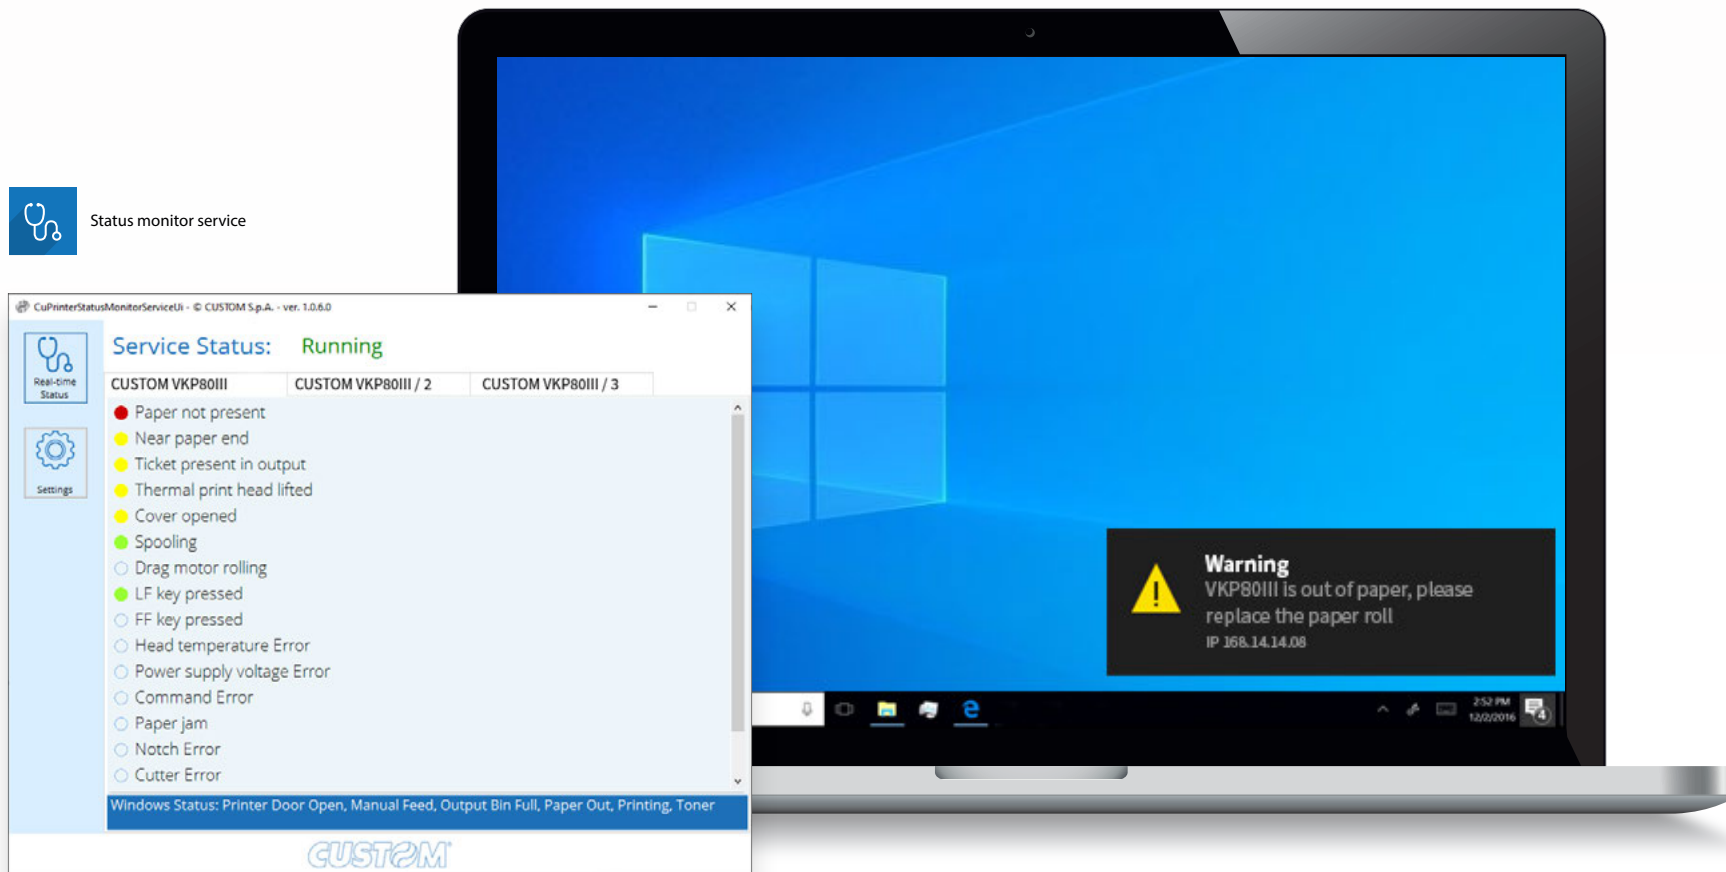

STATUS MONITORING

Custom S.p.A. provides a service for windows operating systems that can monitor the status of printers connected to the network.

The service is fully integrated into the operating system so alarms are notified directly with a pop-up.

To have more control, use the included application which allows, among other things, to set an email alert when a status changes.

USING THE PRINTER WITH CPT

Custom Power Tool is an easy and versatile tool for creating and changing of the ticket layout as alternative to communication protocol.

The user-friendly interface allows you to quickly arrange data and graphic elements with simply drag and drop gesture.

The Software developer will use SDK library to manage ticket data on basically any OS: Windows, Linux, Android, iOS

The sales application will manage by driver the project created with CPT.

Check out the cartoon

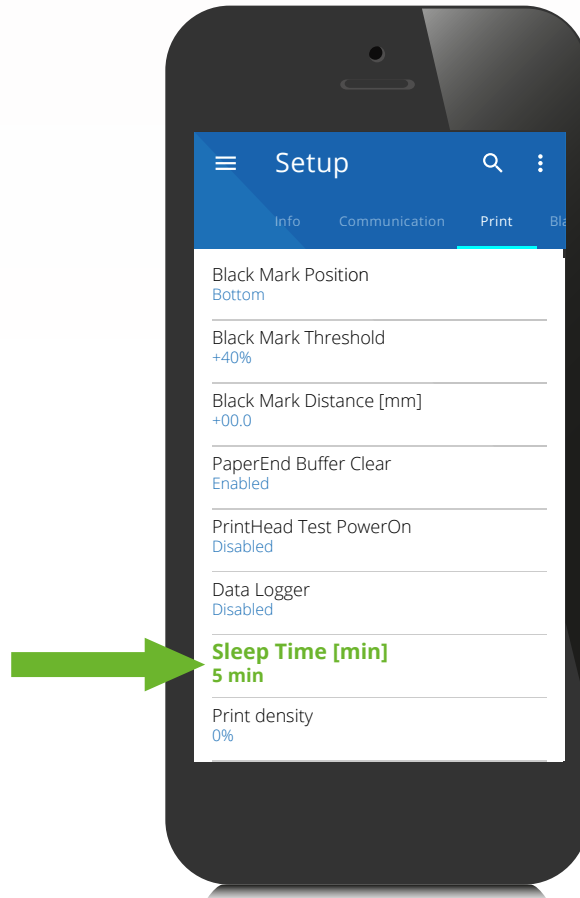

ECOFRIENDLY

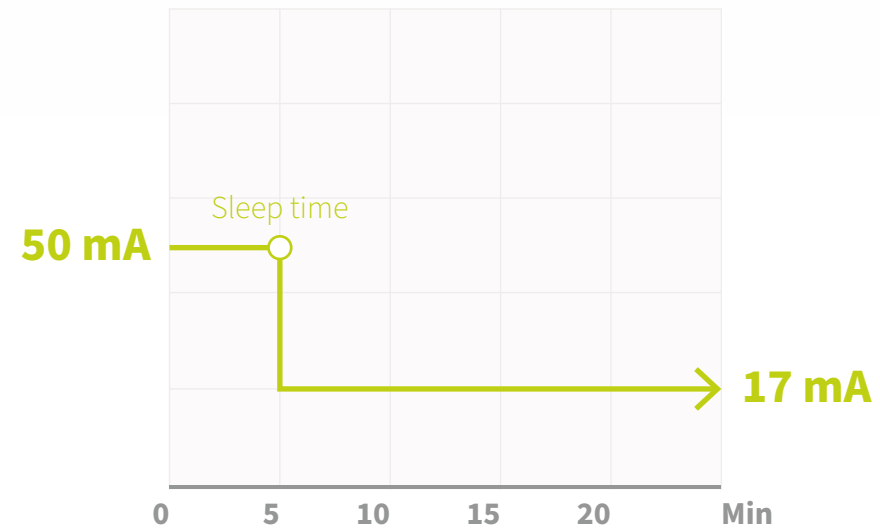

The small tricks adopted on **VKP80III** make the printer eco friendly.

For example **PRINTERSET**, the configurator for PC or smartphone, allows you to avoid the setup procedure on ticket. This reduce the waste of paper.

Or again **VKP80III** can operate in "eco mode" to reduce consumption by **65%** when the printer is not in use (standby).

Standby consumption

COMMUNICATION

Depending on the model purchased, it is possible to communicate via USB, serial or Ethernet port using the Custom/POS protocol or drivers available on www.custom4u.it.

COMMUNICATION VIA PROTOCOLS

Custom/POS (VKP80II emulation)

Custom/POS (VKP80III)

COMMUNICATION VIA DRIVER

CUPS driver for linux

Linux (32/64 bit)

Android API

Android 4.4 or later

Standard driver for Windows

Windows 7 / 8 / 8.1 / 10 (32/64 bit)

Grey Scale (print 16 different shades of grey)

OPOS / OPOS.Net Driver, JavaPOS Library

Self-installing driver for VIRTUAL COM

Windows 7 (32/64 bit)

Windows 8 (32/64 bit)

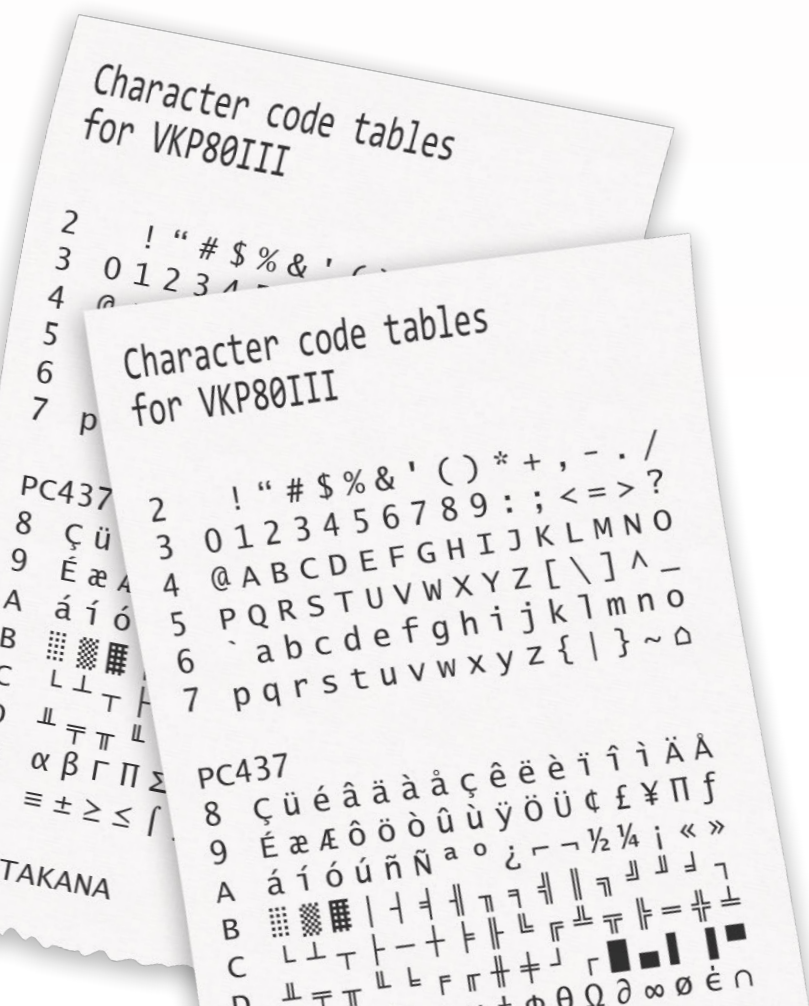

Windows 8.1 (32/64 bit)

Windows 10 (32/64 bit)

VKP80III PRINT EVERYTHING

The three internal fonts (11, 15, 20 cpi) allow you to use a large selection of pre-installed code tables.

In addition to these, further code tables are available on request to satisfy every need.
